

Sales AI Governance Policy

Document ID: SAL-AI-001 | Effective: June 27, 2026 | Version: 1.0 | Classification: Internal

APPROVED — ACTIVE

1. Purpose & Scope

This policy defines approved AI usage for all Sales Department activities across the TechCorp Enterprise AI Platform. It establishes the boundaries within which AI supports sales professionals while drawing a hard line: AI must never autonomously commit pricing, approve contractual terms, or bind TechCorp to any obligation. Every commitment to a customer requires explicit human approval from an authorized sales professional.

This policy applies to all Sales Department personnel, including account executives, sales development representatives, sales operations, and sales leadership. It also applies to **Marketing** personnel contributing to lead generation workflows and **Legal** and **Finance** personnel who engage with AI-generated sales outputs. It operates alongside the **Contract Review & AI-Assisted Legal Analysis Policy (LEG-AI-002)** for contract-related AI workflows.

2. AI Platform Integration

The Sales Department accesses the Enterprise AI Platform through a dedicated sales tenant with commitment-prevention controls enforced by the **IT Department** and audited by the **Legal Department**. Core integrations include:

- **Sales Co-pilot** — AI-assisted deal research, meeting preparation, and account summarization drawing from CRM data enriched by **Marketing's** campaign intelligence and **Finance's** customer payment history, with all outputs advisory-only and clearly labeled as AI-generated.
- **Pricing & Quote Guardrail** — AI may suggest pricing within approved discount bands and standard configurations but is physically prevented from generating quotes outside approved parameters or transmitting unapproved pricing to customers; the guardrail is co-maintained with **Finance**.
- **Meeting Intelligence Engine** — AI transcription, summarization, and action-item extraction from customer meetings, with automatic flagging of any verbal commitments made during calls for post-meeting review by the account executive and **Legal** if contractually relevant.

- **Proposal Drafting Assistant** — AI-drafted proposal language based on approved templates and configured product catalog, requiring sales manager approval before customer delivery and **Legal** review for any non-standard terms.

Connected Departments: Legal (contract terms & commitment review) • Finance (pricing approval & revenue recognition) • Marketing (lead generation & campaign intelligence) • IT (CRM platform & guardrail enforcement) • AI (model governance & sales prompt standards) • Operations (order fulfillment & delivery commitments)

3. Permitted AI-Assisted Sales Activities

Activity	AI Role	Human Oversight Required
Account research & summarization	Data aggregation from CRM, news & internal sources	Account executive reviews before customer engagement
Meeting transcription & action extraction	Transcription & action-item identification	Account executive confirms accuracy; verbal commitments flagged for review
Pricing recommendation within approved bands	Discount calculation & margin impact analysis	Sales manager approves any discount beyond standard tiers; Finance reviews margin impact
Proposal & quote drafting	Template-based first-draft generation	Sales manager approves before customer delivery; Legal reviews non-standard terms
Email & follow-up drafting	Context-aware message generation	Account executive reviews and personalizes before sending
Deal risk assessment	Risk factor identification from historical data	Sales manager reviews risk flags and determines mitigation actions

4. Prohibited Activities

The following are strictly prohibited under this policy:

- **AI auto-commitment of pricing, discounts, or contractual terms.** AI must never transmit a price quote, discount, or contract term to a customer without explicit human approval from an authorized sales professional. The Pricing & Quote Guardrail enforces this technically.

- **AI generation of binding proposals or contracts sent to customers without human review.** Every customer-facing proposal, regardless of how standard the terms, must be reviewed and approved by a sales manager or above before delivery.
- **AI making verbal or written commitments during customer interactions.** AI meeting assistants are passive (recording, transcribing, summarizing). They must not participate in live customer conversations or generate responses on behalf of sales personnel.
- **Uploading customer-confidential information to consumer-grade AI tools.** Customer names, deal terms, pricing configurations, and negotiation positions must only be processed through the approved Enterprise AI Platform tenant.
- **AI-driven competitive disparagement or unverified claims.** AI-generated sales content must not include claims about competitors or TechCorp product capabilities that have not been verified against approved competitive intelligence from **Marketing**.

5. Customer Data Handling & Confidentiality

All Sales Department AI activities must comply with TechCorp's **AI Safety Guidelines** (AI Department) and the **Data Protection Standards** (Security Department). Specific requirements:

- Customer data accessed by AI tools is scoped to the account executive's assigned accounts; AI must not surface information from accounts outside the user's assigned territory.
- AI-generated meeting transcripts and summaries are classified as Confidential and stored with the account record; access is restricted to the account team and sales management.
- Pricing discussions and negotiation history captured by AI are classified as Restricted; access requires sales manager approval and is audited quarterly by **Security**.
- Customer data used for AI training or model improvement must be anonymized and aggregated; individual customer deal terms must never appear in training datasets accessible to other customers.
- All AI interactions with customer data are logged immutably and retained per the data retention schedule coordinated with **IT** and **Legal**.

6. Prompt Engineering & Quality Standards

Sales professionals using the AI Platform must adhere to TechCorp's **Prompt Engineering Standards**. Sales-specific requirements include:

- Account research prompts must include the customer name, industry, and engagement stage to scope the AI's research appropriately; generic prompts produce unreliable outputs.
- Pricing and quote prompts must reference the approved price book version and customer tier; prompts omitting these parameters are blocked by the Pricing & Quote Guardrail.
- Proposal drafting prompts must specify the product configuration, deal stage, and any non-standard requests; the AI must flag non-standard elements for Legal review.
- All sales prompt templates must be version-controlled, approved by Sales Operations, and stored in the department's shared prompt library.
- Quarterly accuracy benchmarking: AI-generated meeting summaries below 90% accuracy on action-item capture trigger a model review by the **AI Department**.

7. Roles & Responsibilities

Role	Responsibility
Chief Revenue Officer (CRO)	Overall sales AI governance ownership; final authority on AI use in sales; approves exceptions to pricing guardrails; escalates AI-related sales incidents.
Sales Operations Lead	Day-to-day AI governance enforcement; prompt template governance; CRM data quality oversight; AI tool access management; training coordination.
Sales Managers	Proposal and quote approval; deal risk review; ensuring team compliance with AI review requirements; escalating AI anomalies to Sales Operations.
Account Executives	AI output verification before customer delivery; meeting summary accuracy confirmation; prompt usage per approved templates; reporting AI output issues.
Legal Department	Non-standard contract term review; AI-generated proposal compliance verification; commitment guardrail legal validation; contract-related AI incident response.
Finance Department	Pricing band and discount authority definition; margin impact analysis for AI-suggested pricing; revenue recognition alignment; pricing guardrail calibration.
Marketing Department	Approved competitive intelligence for AI sales content; campaign data for lead enrichment; brand-compliant messaging in AI-generated communications.
IT Department	CRM platform and AI tool infrastructure; Pricing & Quote Guardrail technical enforcement; sales tenant access provisioning; integration maintenance.
AI Department	Sales model accuracy monitoring; meeting intelligence quality; prompt standard updates; AI safety review for sales-use models.

8. Incident Response

Any of the following constitutes a sales AI incident and must be reported within the timeframe specified:

- AI-generated pricing or contract terms reaching a customer without human approval — report within 1 hour to the CRO, Sales Operations Lead, and Legal; customer communication issued to correct or retract within 4 hours.

- AI making unauthorized commitments during a recorded meeting — flagged by Meeting Intelligence Engine; account executive reviews within 2 hours; customer clarification issued if the commitment is inaccurate or unauthorized.
- Customer data from one account appearing in AI outputs for another account — report within 1 hour to Sales Operations, IT, and Security; data isolation breach investigated; affected customers assessed for notification by Legal.
- Pricing & Quote Guardrail bypass or failure — Security and IT notified within 30 minutes; guardrail restored; all quotes generated during the gap reviewed for compliance.
- AI-generated competitive or product claims found to be false or unverified — report within 4 hours to Sales Operations and Marketing; affected customer communications corrected.

All sales AI incidents are logged in the platform's incident management module. Incidents involving customer exposure require Legal assessment of notification obligations within 24 hours. Post-incident review involving Sales Operations, IT, and affected departments is mandatory within 5 business days.

9. Training & Compliance

- All Sales Department personnel must complete the Sales AI Governance & Ethics training within 30 days of hire and annually thereafter.
- Account executives must complete the AI-Assisted Selling workshop covering prompt standards, output verification, and prohibited uses before receiving AI tool access.
- Sales managers must complete the AI Quote & Proposal Approval training covering guardrail operations, discount authority, and escalation procedures.
- Quarterly AI sales compliance audits are conducted by Sales Operations with coordination from Legal and IT; audit results reviewed by the CRO.
- Non-compliance with this policy, particularly unauthorized commitment of pricing or terms, is subject to immediate AI tool access revocation and the progressive discipline framework administered by HR.

10. Review & Revision

This policy is reviewed every 6 months by the CRO, Sales Operations Lead, and designated sales managers, with input from the Legal Department (for contract and commitment guardrails), Finance Department (for pricing bands and revenue recognition), Marketing Department (for competitive intelligence and messaging standards), IT Department (for guardrail and CRM infrastructure), and AI Department (for model accuracy and safety). Revisions are versioned, approved by the CRO, and synchronized with updates to the Contract Review & AI-Assisted Legal Analysis

Policy, the Financial AI Governance Policy, and the TechCorp AI Safety Guidelines. Emergency revisions triggered by sales AI incidents follow an accelerated 14-day review cycle.
